

## STAINLESS STEEL CYLINDRICAL CATERING URNS

### Description

Pre-heating water allows for instant service of hot drinks along with food. Available in various sizes to allow for the perfect selection for your personal needs.

Constructed with AISI 304 stainless steel for added durability the MF catering urns come as standard with an adjustable thermostat allowing temperature control of up to +100°C, water level indicator and a concealed element for easy cleaning.

### Features

- AISI 304 stainless steel construction for stronger durability
- Adjustable thermostat temperature control
- Water level indicator
- Concealed element for easy cleaning and maintenance
